Job Title	Histotechnologist Technical Lead
Location	University of Minnesota Medical Center, Fairview (East Bank)
Department	Pathology Laboratory
Hours per 2 weeks	80
Shift	Day

Job Number 11-36731

Job Description:

The Technical Lead functions independently in performing all major work responsibilities of professional laboratory practice. A Technical Lead acts as a resource for problem resolution and interpretation of results. The Technical Lead may be responsible for method development research, instrument correlation, and method validation. The Technical Lead correlates data based on clinical knowledge, technical expertise, and other conditions affecting test results. The Technical Lead participates in laboratory performance improvement activities. The CLS Technical Lead collaborates with the customers of the laboratory to promote appropriate use of laboratory resources. In the absence of a supervisor, a CLS Technical Lead may direct work flow in the daily operation of laboratory section and provide direction and problem solving skills for laboratory functions.

Job Qualifications:

Education: Bachelor's in a related laboratory field including the related lab practicum or equivalent routes as specified in CLIA'88. (Certification: HTL (ASCP) is required prior to hire. Experience: A minimum of two years experience as a HTL.
